

# 10SL FAQ

## Question 23.07.2010

### Corally:

I've got a question about your parts list? Is the rear pod different in the kit than the one shown for parts? Also is the standard chassis less than 3mm? does the kit come with the four springs for the links (x soft, -soft medium and firm) or do I have to order that separate?

### Answer

The new rear motorpod for 10SL (shown in the news on the website) is the same as each car comes in the kit. The new motorpod is different to the old type of 10X NG car kit. The new type has e.g. the bearing holders which are integrated in the duraluminium parts of the motorpod. Also you can exchange the standard moulded bearing holders for the new dural version which is available in 0.5 steps (0.5 / 1 / 1.5 / 2 / 2.5 / 3).

### OPTION PARTS:

- #75532 10SL Bearing Holders – 0.5 Setting – Hard Anodised Aluminium (1 pair)
- #75533 10SL Bearing Holders – 1.0 Setting – Hard Anodised Aluminium (1 pair)
- #75534 10SL Bearing Holders – 1.5 Setting – Hard Anodised Aluminium (1 pair)
- #75535 10SL Bearing Holders – 2.0 Setting – Hard Anodised Aluminium (1 pair)
- #75536 10SL Bearing Holders – 2.5 Setting – Hard Anodised Aluminium (1 pair)
- #75537 10SL Bearing Holders – 3.0 Setting – Hard Anodised Aluminium (1 pair)

The car kit comes with 3mm graphite parts and includes the black medium springs. The other springs are available as option parts.

- #75551 10SL Side Springs – For rear suspension – X/SOFT (1 pair) - OPTION
- #75552 10SL Side Springs – For rear suspension – SOFT (1 pair) - OPTION
- #75553 10SL Side Springs – For rear suspension – MEDIUM (1 pair) - STANDARD**
- #75554 10SL Side Springs – For rear suspension – HARD (1 pair) - OPTION
